| <b>Owner:</b>  | Belinda Barbas  |
| <b>Patient:</b>  | Bailey – Arabian Horse (30ish)  |
| <b>Wound/Ailment:</b>  | Large abscess on neck   |
| <b>MicrocynAH<sup>®</sup> Product:</b>                       | MicrocynAH <sup>®</sup> Wound & Skin Care - Liquid  |
| <b>Application:</b> (initial usage, current usage, protocol) | Applied MicrocynAH <sup>®</sup> 3 times a day in conjunction with a sterile water flush infused with antibiotics for 5 days. We used MicrocynAH <sup>®</sup> at each dressing change, which was 3x a day until the wound began to drain, then 2x a day.<br><br>Antibiotics used in conjunction with MicrocynAH <sup>®</sup> : SMZS for 10 days, Metronidazole for a couple of days because Bailey could not tolerate it.  |
| <b>Healing Period:</b>                                       | 4 weeks and 5 days  |
| <b>Owner Comments:</b>                                       | <p>“Bailey is a thirty-something Arab, who I have owned for 14 years. He is an amazing horse with a strong will to live. Bailey was so sick from the wound that I discussed euthanasia with my vet. I believe that the antibiotic flush helped fight the raging infection, but the daily care with the MicrocynAH<sup>®</sup> speeded his remarkable recovery. There is barely a scar where the wound was. For a horse at Bailey’s age to recover from such a severe wound (so deep that I could put my hand into the wound up to the end of my fingers), is just a miracle.</p> <p>I feel that MicrocynAH<sup>®</sup> played an important role in his recovery. I am glad that a friend told me about MicrocynAH<sup>®</sup> when I was beginning to feel hopeless that the wound would never heal. My vet was also pleased with the results.”</p> <p>Belinda Barbas</p> |

### IMMEDIATE ACTING, ONE-STEP WOUND & SKIN CARE

MicrocynAH<sup>®</sup> Wound and Skin Care products are innovative topical solutions for the care of wounds and irritations. MicrocynAH<sup>®</sup> is non-toxic, steroid-free and antibiotic-free and will not sting when applied. There is no rinsing or staining after use. MicrocynAH<sup>®</sup> is intended for OTC management of skin abrasions, lacerations, minor irritations, cuts and intact skin.
