

Horse Trapped in Barbed Wire

Before (Day 1)

After (Day 75)

Information displayed is provided by our customers. MicrocynAH[®] is a great addition to any wound care regimen. Always consult with a veterinarian for systemic conditions.

Owner Name:	Unknown
Patient Type & Name:	14-year-old mare, Camila
Wound/Ailment:	In August 2017, Camila was caught up in barbed wire and as a result, her right rear hock was severely torn open, leaving exposed flesh and bone.
MicrocynAH[®] Product:	MicrocynAH [®] Wound & Skin Care - Liquid
Application: (initial usage, current usage, protocol)	Her wounds were cleaned and treated topically up to three times a day using MicrocynAH [®] .
Healing Period:	After 74 days, Camila's wound has improved significantly with continuing closure of the wound and no infection.

IMMEDIATE ACTING, ONE-STEP WOUND & SKIN CARE

MicrocynAH[®] Wound and Skin Care products are innovative topical solutions for the care of wounds and irritations. MicrocynAH[®] is non-toxic, steroid-free and antibiotic-free and will not sting when applied. There is no rinsing or staining after use. MicrocynAH[®] is intended for OTC management of skin abrasions, lacerations, minor irritations, cuts and intact skin. Aids in the healing process by debriding and cleaning wounds, cuts and lacerations.
