

## Horse with Neck Wound

Before (Week 1)

(Week 6)

After (Week 16)

Information displayed is provided by our customers. MicrocynAH<sup>®</sup> is a great addition to any wound care regimen. Always consult with a veterinarian for systemic conditions.

<b>Owner Name:</b>	Rachael Moore
<b>Patient Type &amp; Name:</b>	Quarter horse, George Tupelo
<b>Wound/Ailment:</b>	Neck Wound
<b>Owner's Comments:</b>	<p>George Tupelo, a 2012 quarter horse, was a stallion at the time of his injury. George appeared to have filleted his neck open, perhaps on a metal building, but that's uncertain. Initially, we had a competing wound care solution on hand and for two days we treated with that product as well as daily injections of penicillin. But we found the competitive product was too costly for the amount of time it would need to be used throughout treatment. That is when we discovered MicrocynAH.</p> <p>MicrocynAH was the key of the treatment protocol from day three of the injury up until it was completely healed four months later. WE were VERY thankful for the impressive results and MicrocynAH will continue to be OUR go-to product for all things wound care!</p>
<b>MicrocynAH<sup>®</sup> Product:</b>	MicrocynAH <sup>®</sup> Wound & Skin Care Hydrogel
<b>Application:</b> (initial usage, current usage, protocol)	His wounds were cleaned and treated topically up to three times a day using MicrocynAH <sup>®</sup> .
<b>Healing Period:</b>	4 months

### IMMEDIATE ACTING, ONE-STEP WOUND & SKIN CARE

MicrocynAH<sup>®</sup> Wound and Skin Care products are innovative topical solutions for the care of wounds and irritations. MicrocynAH<sup>®</sup> is non-toxic, steroid-free and antibiotic-free and will not sting when applied. There is no rinsing or staining after use. MicrocynAH<sup>®</sup> is intended for OTC management of skin abrasions, lacerations, minor irritations, cuts and intact skin. Aids in the healing process by debriding and cleaning wounds, cuts and lacerations.
